Mark McRae: For the first time ever, I am about to let a small group of people see one of the systems that won one of my trading competitions. Previously you had to pay to see something this special. You can see it here: This system made 1,306.50% in one month trading a live account. What's more, the whole system is revealed for the first time outside of the most elite trading club in the world.

This may be the only chance you get to see something this special. Once you see how easy this system is you will wonder why you are complicating your life with multiple indicators.

Last thing before I go:

The competition to receive the winning systems plus a years membership to the worlds most elite trading club worth \$999 is still running. Just tell me your opinion on why the Forex world has changed, and the best answer will pick up the prize. The competition still has two weeks to go but as you will see from the comments on the page, people are excited about what is happening. No one is more interested than me...as I sponsored all the live accounts :-)
