Forex Bulletproof Did Not Have A Loss In 2,300 Days-Get A Glimpse Of Its 4,000 Line Code

Discover a [Forex Robot](#) that made 2,500% NET PROFIT in 2009 and download the Forex Auto Detector Software FREE that can increase the profitability of any forex robot by 53% and more. Get on the waiting list of [Forex Bulletproof](#). First test a Forex Robot on your [Forex Demo](#) Account and only then trade live! Hundreds of FX robots on the market... and almost none work! We'd say that it's more or less "official" that most FX robots don't make it past the backtest (and many, not even that far!) We're all tired of seeing inflated promises attached to useless robots but, things are starting to look better (actually MUCH better!) Today I want to introduce to you a dedicated team of EA developers who stepped up to the plate and said "enough!"

These guys have decided to take things into their own hands and finally bring the market what everyone's searching for... a robot that actually WORKS! Did you know that the average FX robot contains about 400 lines of code? Well... this one has over 4,000! Yes... four thousand! These guys have managed to produce a monster that hasn't had a loss for over 2,300 days. That's impressive by any standard.

So far, not much news has leaked through... but the information released today is already causing a huge buzz in the community - a few beta-test copies have been sent to selected people for trialing and it looks breathtaking...By the way... the main creator of the robot (who also happens to be one of the main creators of FapTurbo!) has done something really nice for you...Scroll down that page and see Steve's life story... I loved it :-). So...Stay on top of this one... you won't regret it! That page also let's you register for more information and a chance to obtain a copy "on the house":

I hope you now know about Forex BulletProof... one of the most promising EAs on the market (and yes, the FapTurbo team is behind it!) Anyway... today I've got something great for you - something that hasn't been done before! The FBP team's revealing key code lines that have been programed into the robot... they're exposing stuff NO-one ever dares to. Also...You'll be able to see the FBP team and how hard they've worked.

By the way, one of the development team members managed to make over 10,000% net profit with the robot during the programing and testing phase! Remember, too, that you'll still be eligible for a NO-Cost copy of the robot...Frankly, I've never seen anyone talk so openly about the development of an EA or expose so much of it publicly. I've got some very interesting news for you on the Forex BulletProof launch.

The Forex BulletProof team gives you a look behind the curtain and shows you the code lines that have been programmed into the EA... okay, not everything and okay, they give it to you so fast that you cannot actually grab the code (take that pirates!) ...but still, over 4000 distilled programming lines made up in over 500 hours of work with 5 programmers... it's pretty darn impressive. You gotta see this for yourself!

You will also meet the team and see images of them and how they worked (one of them managed to make over 10,000% profit it seems during programming??) and get some great insider news! It's well worth a visit + the competition is still on to get a free copy once the launch is on! Don't hesitate and have a look... it's really a "one of a kind" experience since I've never seen anyone talk so openly about development before... I'll definitely be keeping this one in my "crosshairs" and I'll be sure to let you know if I have further news!
