You may hear this a lot with so many of the other systems released and the hype that comes with them... let me be frank here...Forex Bullet Proof has my vote for EA of the year!!

Steve and his team are the MOST transparent I've seen yet, allowing their Beta code to be seen by the public and critiqued by the leading minds in Forex. What You probably already knew is that Forex BulletProof operates on the Metatrader platform...What You probably did NOT know is that theres also a Beta version of Forex Bullet Proof coded for the latest trading platform STRATEGY TRADER from the FXCM brokerage.

Yes, ForexBulletproof will be the WORLDS FIRST commercially available FX robot on the strategy trader platform that was first presented in Las Vegas at the FXCM Expo! Now not only do they claim better and faster executions since Strategy Trader uses no bridges and was exclusively developed for FXCM... the results seem to be truly astounding too!

Sound all a bit Sci-Fi? I bet it does, but since I have reserved my copy and the Strategy Tester version is included right next to the proven and tested MetaTrader4 version I couldn't care less if it's Beta or not.. I'm gladly looking forward to new technology and if I can have it first and step onto new grounds of moneymaking...I'm all ears!

Steve and his team are offering streamlined updates each time they find a new way to keep Forex Bulletproof the top EA on the market and all without charge! I had a talk with Steve yesterday and every winner of a free BulletProof copy will get a Strategy Trader Version too. You have questions and you need to see it for yourself, understood...head over quickly, read the pdf report on strategy trader and conquer the markets immediately!! The total costs associated with supporting this NEW Forex system are \$637,450(!!). Seriously see the breakdown here...This is no joke. This is something stunning never seen before in the trading industry. But what I have to applaud these guys for is their passion for sharing their system.

As a special bonus (should be closing TODAY) they're giving away copies of their system in a special bonus deal that will shock you. Just look at the breakdown of those \$637,450 costs here and you'll be stunned by this (guaranteed): There is a serious threat this private page will be taken down today - if you don't check this out now you may well regret this...
