THE BARE TRUTH ABOUT THE FOREX BULLET PROOF

If you were not in jungle in the past few weeks, you must have heard about the HUGE buzz around Forex Bulletproof robot.

Due to my status, and connections in the industry I've had the chance to test The Bullet Proof since its very first phase. Although there're still pretty much room for improvement, I would say The Bullet Proof is already ONE of THE TOP THREE Forex Robots available.

I'll tell you all about the other TWO in a minute, but first let's address an IMPORTANT ISSUE with the Bullet Proof:

=====
It might be bulletproof, but will it be BROKER-PROOF?
=====

I was browsing some forex forums when I saw a fellow trader raised this valid concern.

"If too many copies are sold, I'm sure the major brokers will figure it out and make it difficult for Bulletproof to perform like it was designed..."

We all know the story of their previous creation- FAPTURBO. Too many copies are sold, the market reaches saturation... and brokers start playing TRICKS. Looks like they've learned their lessons. And decide not to give out more than 10,000 copies. WISE MOVE. BUT I GO ANOTHER STEP FURTHER.

99.5% of Forex Bulletproof owners won't realize its full potential. 0.5% will. Because the first 0.5% (50 people) who get Bulletproof through my link, will get the OTHER TWO TOP ROBOTS: THE DUO KILLERS. Those are the only ones who will reach its maximum profits. And if you're one of them, you'll never have to worry about "too many copies sold" problem.

THESE TWO DUO KILLERS IMPECCABLY COMPLEMENT THE BULLET PROOF AND SKY ROCKET YOUR TRADING PROFITS

like...

3,021,763 and 4,679,622 in Profits...

3,333% and 5,188% Annual Gain...

As you probably already know, the Forex Bullet Proof System is about to go live at 9 AM EST on the dot. But what

you may not know is that the default version doesn't come with the most optimized settings, in fact, the default settings will NEVER help you realize your dreams...

Bill Poulos: For years, I've been watching from the sidelines as "amateur hour" Forex robots appeared on the scene only to disappear a few weeks or months later because...

-THEY DON'T WORK!

And because of my position in the trading education community, I'm frequently asked by these robot-makers to alert to my readers (YOU) to their latest creation. 99% of the time I refuse. I say to them, "show me something that really works, and I'll consider it". But it looks like things may be taking a turn for the better...

From a team of 5 programmers comes a Forex automated income tool that claims consistent gains for the last 6 years...And I'm not talking about doubling your deposit in 1 month only to lose it in the next... I know we've all had it with those fly-by-night robots...

This is probably different from anything you've seen before...Right now, not much news has leaked through... but the information that has leaked is already causing a huge buzz in the community.. a few beta test samples have been sent to selected people for testing (including me) and it looks very interesting...(It has over 4,000 lines of code when your average "robot" has about 400...)
